

AI FACTORY 2.0 - COMMAND CENTER INCIDENT REPORT

Generated: 2026-08-30 11:37:36 | Facility ID: FAC-NORTH-01

Target Machine ID:	MCH-01 CNC Mill
Failure Risk Confidence:	96.0%
Defect Severity (Vision):	Critical
Primary Recommendation:	REDUCE_LOAD_AND_INSPECT

1. Multi-Agent Consensus Findings

Vision Agent: Defect Detected - *Crack* (Confidence: 94.0%)
Predictive Maintenance Agent: Sensor Telemetry Warning - Temperature 58.2°C, Vibration 2.5 mm/s.
Knowledge Agent: Retrieved Grounded SOP Evidence from *CNC_SOP.txt*.
Planning Agent Decision: ['CRITICAL: Initiate 30% speed reduction on machine.', 'PROTOCOL: SOP-MNT-2026: Continue standard operational monitoring.']

2. Digital Twin What-If Operational Simulation

Scenario	Units Lost	Failure Risk	Est. Financial Loss (\$)
Continue Operation	480	100.0%	\$39,840.00
Immediate Maintenance	300	5.0%	\$14,875.00
Reduce Load (-30%)	288	33.6%	\$19,872.00
Reroute to Line 02	246	2.0%	\$11,670.00

3. Human Supervisor Sign-Off & Audit Trail

Supervisor Action: **APPROVE RECOMMENDED ACTION**
Supervisor ID: SUP-8821
Audit Timestamp: 2026-08-30 11:37:36
Supervisor Notes: Action approved per digital twin scenario analysis.
